

UKCIPnext consultation session

- Very **wide range of users** for UKCIP02
- UKCIPnext will be a **significant departure** from what we currently offer
- Our aim: to make next package as **useful** as possible, and to **facilitate uptake** for broad user base
- This session: one of many designed to **inform** user groups of progress, to gain an idea of **user needs and preferences**

UKCIPnext workshop session 1

- **All groups:** “Bearing in mind the work underway, how can we make this next package of climate change information useful for CLIFFS members?”

UKCIPnext workshop session 2

- **Group 1:** “Which **joint-probability events** are important to CLIFFS members?”
- **Group 2:** “How should the UKCIPnext data be presented in order to **facilitate uptake** by CLIFFS members?”
- **Group 3:** “To what extent are impacts dependent on **thresholds** being crossed? To what extent are decisions sensitive to set statistics (e.g. technical guidance, building regulations)?”
